

Off-grid solar containerized type for highways

Whether deployed as a standalone microgrid or part of a larger portfolio, our containerized systems ensure rapid installation, guaranteed reliability, and the resilience needed for extreme environments.

Our containerised off-grid solar solutions are fully customizable, and our team of experts provides end-to-end support, from site assessment to installation and maintenance.

Solar containers are unlike rooftop systems, which are designed for fixed installations. Solar containers integrate panels, batteries, inverters, and controls in a moveable package -- often...

The Intech Energy Container -- or ECON -- is a modular, pre-configured off-grid power solution. It combines solar PV, battery storage, inverters, and energy management in a rugged container.

Designed to provide power where there is no grid connection and never will be and the only source of energy would have be generated. The MOBIPOWER portable power container can be used virtually ...

The MEOX Containerized Solar Power System combines rugged steel construction with cutting-edge solar technology, delivering reliable off-grid energy solutions in 20ft and 40ft configurations.

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

Discover Solar GEM™, a prefabricated, mobile solar solution designed for off-grid energy needs. Scalable, robust, and ready-to-deploy worldwide.

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.
