Do you need a solar generator?

Most solar ready-made generators have enough power to power the average home and cater to your needs. However, if you need to power your entire home or get more power than usual, you'd need to invest in a couple of solar generators to achieve this.

Are portable solar generators a complete home grid power replacement?

Portable solar generators are not complete home grid power replacements. If that were the case, everyone would be rushing to buy and live off of solar generators. Some large and expensive solar array systems can offset all your energy needs. But this takes thousands of dollars, permits, and contractors to achieve this.

How do I choose a solar generator?

When choosing a solar generator, two key specs matter: watt-hours (Wh): How much energy it can store. continuous wattage output (W): How much power it can deliver at once. For example, small portable generators might offer 200-500 Wh, enough for charging phones, lights, or a small fan. Battery chemistry also matters.
