

Ottawa one city one energy storage project

Environmental organizations and a local renewable energy co-op are applauding Ottawa City Council's approval of a controversial and hard-fought battery energy storage project, especially ...

A massive energy storage facility to be located in rural west-end Ottawa was recently approved by city council, but remains a contentious project among locals in the area.

Evolugen, a renewable energy company based in Gatineau, Que., is looking to build a facility in South March after its initial plan to build one in Fitzroy Harbour failed to get city approval.

Ottawa city councillors voted to support a controversial battery energy storage system (BESS) facility in West Carleton despite the objections of rural councillors and residents who voiced...

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System ("BESS") is the fastest emerging technology in North America and is planned to be deployed ...

Residents in the Dunrobin area are not happy after Ottawa city council confirmed its support for a battery energy storage system (BESS) in the community.

On May 9, 2024, the IESO announced that ten proposed BESS projects were selected, totaling 1,784 megawatts (MW) of energy storage, including two to be located in rural west Ottawa.

The project can store 250 MW of electricity, making it the largest battery energy storage system proposed in the Ottawa area so far. A 250 MW battery can supply enough power at one ...

The company is seeking to build a Battery Energy Storage System (BESS) on a 4.5-hectare plot of rural land off Marchurst Road, about 30 kilometres west of downtown Ottawa.

More than 60 speakers lined up Thursday to speak to the City of Ottawa's Agricultural and Rural Affairs Committee over a proposal to build a vast electrical storage facility in West...
