

Are Electric patio heaters a good choice?

However, finding the right patio heater for your space can be tricky. While gas-powered heaters typically provide the most heat, electric patio heaters offer more convenience. Plus, many shared buildings don't allow propane heaters, which is where electric patio heaters can especially prove useful.

Which outdoor infrared patio heater is best?

Our best overall pick, the East Oak Outdoor Infrared Electric Heater, offers a remote, which we found useful during testing. While electric patio heaters are more convenient to use than propane or natural gas heaters, there are still safety precautions to take while operating. Always make sure to stay near the patio heater while it's turned on.

What size patio heater is best?

However, the best electric patio heaters for large patios (up to 1,000 square feet) will range up to 20,000 Btu. Electric patio heaters are less powerful than propane or natural gas models, so if you need to heat a larger area, you may consider choosing a propane-powered heater instead.

How much BTU does a patio heater need?

A patio that's only 100 square feet won't need a super-powerful heater and may only need an output of 5,000 Btu. However, the best electric patio heaters for large patios (up to 1,000 square feet) will range up to 20,000 Btu.
