

Photovoltaic station will be built at the site of Lavera refinery in France. China's largest oil company PetroChina has outlined plans for the development of a major solar energy project to...

PetroChina Tarim Oilfield Solar PV Park is a ground-mounted solar project which is spread over an area of 478 hectares. The project generates 400,000MWh electricity thereby ...

Since the trial operation in early April, the petrol filling station has achieved photovoltaic power generation of a total of about 3 megawatt-hours, which is equivalent to the reduction of carbon ...

URUMQI, Sept. 9 (Xinhua) -- The photovoltaic power project in the Tarim Oilfield has generated over 105 million kWh of green electricity so far this year, said its operator, China National Petroleum ...

In September 2025, PetroChina completed the group's first perovskite module PV demonstration power station at Well Xian-Dong 8 in the Qinghai Oilfield, with a peak installed ...

As of November 8, PetroChina's first surface solar panel project, Daqing Oilfield Xinghuo Photovoltaic Power Station, has been running smoothly for 131 days, with a cumulative power ...

China-based PV module manufacturer, Astronergy has supplied 472 MW of ASTRO N5 modules to PetroChina's utility-scale solar station in Qinghai Province. The facility, located in the ...

On November 5, the first and largest single photovoltaic (PV) power station of PetroChina Tarim Oilfield was completed and became operational. The 3.6-MW PV power station is a surface engineering ...

Gansu Yumen (PetroChina) Experimental Renewable Hydrogen solar power plant is an operating solar photovoltaic (PV) farm in Yumen City, Jiuquan, Gansu, China.

It is a zero-carbon demonstration project built to replace diesel generators for water pumping and irrigation, providing green electricity for irrigating over 3,100 hectares of ecological ...
