

We are a professional manufacturer dedicated to cold bending equipment, our engineers can customize different equipment according to the needs of different customers.

Xinhonghua produces cold bending roll forming equipment such as photovoltaic bracket machines, C/Z purlin equipment, roof panel and floor deck forming systems.

Combining strength and precision: Through the cold-bending forming process, the product not only ensures structural strength but also features extremely high dimensional accuracy.

Hebei Hengfu Roll Forming Machine Co., Ltd. is a professional manufacturer of cold-bending forming equipment and its complete set of automated production lines.

This equipment is mainly used for the production and manufacturing of photovoltaic brackets (C-shaped steel, U-shaped steel). Patented products/processes, high precision and high efficiency, long mold ...

Photovoltaic bracket cold bending equipment specializes in producing metal brackets required for solar panel installation.

Explore our top - notch solar PV bracket forming machine equipment. Engineered for high efficiency and precision, it can meet all your solar PV bracket production needs.

The fully automatic cold bending forming machine for photovoltaic supports is an advanced piece of equipment. It efficiently cold - bends and shapes metal materials into precise photovoltaic brackets.

Photovoltaic bracket cold bending machine This machine is suitable for the cold bending forming production of photovoltaic brackets: ? Maximum forming speed: 30 meters per minute; ? ...

The purpose of the utility model is to provide a kind of photovoltaic bracket cold-bending forming machine, cutting process does not easily cause product to become Shape.
