

Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

Access high-resolution static maps to visualize global solar potential. For site-specific prospecting and bankable project analysis, use our professional solutions.

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

View an interactive map or download geospatial data on solar photovoltaic supply curves.

Solar Potential Map by AddressGoogle SunroofProject SunroofSolar PanelsGoogle Sunroof APIWhere Should Solar Panels Be Positioned?Frequently Asked QuestionWrap UpThe Solar Potential Map by Address is a tool that allows you to input your address and find out the potential for solar energy production at your location. The National Renewable Energy Laboratory (NREL) created the map and provided data on rooftops across the United States. The map is based on several factors, including roof size, orientation, til...See more on poweringsolution SolargisFree Solar Maps & GIS Data | High-Res DownloadAccess high-resolution static maps to visualize global solar potential. For site-specific prospecting and bankable project analysis, use our professional solutions.

This map contains multiple layers showcasing solar infrastructure within the US. The map visualizes solar power plants, electric power transmission lines, and the photovoltaic (PV) ...

View the map of solar panel locations near you: solar farms, solar communities, solar parking lots, solar schools, solar roofs on buildings.

The map takes into account the amount of sunlight that hits your location, as well as the angle of your roof. You can also use the map to determine how much money you could save by ...

You can pan and zoom in and out on this map to see other nearby projects. You can also see the footprints of selects solar parks and regions using the "Solar Parks" and "Clusters & Sites" menus above.

Interactive U.S. Solar Farms & Solar Parks Map showing plant boundaries, owners, nameplate capacity (MW), and power output. Based on EIA-860/860M/923. Filter by utility-scale photovoltaic and CSP ...

The U.S. Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. front-of-the-meter, photovoltaic facilities, direct current capacity of 1 megawatt or more, that became ...
