

General disclaimer: The test results presented in this report relate only to the object tested.

This document is an inspection, test and commissioning report for a grid-connected photovoltaic system according to relevant standards. It documents the system description including module and inverter details.

Our service portfolio focuses not only on traditional crystalline and thin-film PV modules but also on building integrated PV modules (BIPV) and smart PV modules, covering all tests in IEC ...

This document is an inspection, test and commissioning report for a grid ...

PV strand cables, PV generator cables and PV DC main cables have been selected and constructed so that the risk of earth faults and short circuits is reduced to a minimum (DIN VDE 0100-712 para. 522.8.1)

NLR scientists study the long-term performance, reliability, and failures of photovoltaic (PV) components and systems in-house and via external collaborations.

Tests performed (name of test and test clause): All tests were performed in CBTL.

Xinyi PV Products (Anhui) Holdings. Ltd. N/A. The test results shown in this test report are exclusively referred to the tested samples. The results refer to the sample as received.

Photovoltaic (PV) System Acceptance Test Report. The PV system acceptance test is conducted by Eternax Solar, based on the guidelines from the California Energy Commission (CEC).
