

While you are browsing solar power companies, one of them may offer to install a solar panel or solar roof in your home for a small cost or even for free. It's an intentionally misleading claim.

Solar panels, typically mounted on rooftops to maximize sunlight exposure, are often misconceived as a risk to roof integrity. However, there's minimal risk of damage with a professional ...

Let's get one thing straight: solar panel technology isn't a scam. Solar panels absolutely work, producing electricity from sunlight and saving homeowners real money. Millions of people are ...

Not all door-to-door solar sales are considered scams, but what they pitch should be taken with a grain of salt. Going solar is expensive and shouldn't be an impulse decision, no matter how...

While they might say they're from your utility company or the government, they're not. And while they promise free or low-cost solar panels, or offer you huge rebates, tax credits, or utility incentives to ...

This article explores the most common solar panel scams, provides tips to recognize red flags, and offers guidance on protecting yourself from fraudulent solar companies.

Scams are unfortunately common in the solar industry. Learn more about some of the most likely scams you may face when trying to go solar.

To avoid getting scammed, you need to know what to look out for and when to walk away. Here's our guide to spotting solar panel scams and finding a great installer.

Absolute bullshit in the sense that "solar panels are scams" as you titled your post. Any legitimate PV installer is going to do a site survey and an AEP estimate before installing anything. If your site isn't a ...

The three most common solar scams are so-called free solar panels, requests for detailed personal or financial data right away, and misleading contracts.
