

Explore the top US utility-scale solar projects of 2024-2025. Learn how gigawatt-scale farms and integrated battery storage are powering America's energy future.

Explore more planned energy projects in the US. On this page, you can explore our database of planned solar projects in the US. Each month, we track projects in development and update our list of the ...

The U.S. Department of Energy Solar Energy Technologies Office (SETO) supports PV research and development projects that drive down the costs of solar-generated electricity by improving efficiency ...

Below are the top five largest solar installations in the U.S. as of 2024, based on their power generation capacity.

Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

Over a half of the top nation's utility-scale PV projects are based in California - the sunniest state of the country. The Beach State houses the largest solar power station as of 2020 - 579MWAC Solar Star. ...

Concentrating solar power (CSP) projects in United States are listed below alphabetical by project name. You can browse a project profile by clicking on the project name. You can also access information on CSP ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.
