Can a 12V battery run a 24V inverter?

The straightforward answer to this is noas inverters are coming as either 12 volts or 24 volts and therefore,a 12V battery would not be able to run a 24V inverter and this is because a 12V battery at the maximum potential will be generating 14.4 peak volts which is not enough voltage to run a 24-volt system.
