

Can renters install solar panels on their own?

In most cases, renters can't install solar panels on their own-- major structural changes like roof installations require landlord approval. However, that doesn't mean you're out of options. In fact, 2025 sees new opportunities opening up for tenants to benefit from solar -- without footing the full bill.

How do I choose a solar panel system for my rental property?

**Roof Space:** The available roof space on your rental property will determine how many solar panels you can fit onto it, which affects the overall capacity of your solar panel system. **Budget:** Your budget plays a significant role in deciding how big or small you want to go with a solar panel system installation.

Do you need a lease to install solar panels?

It is also important to consider any contractual agreements between you as a renter and your landlord before installing solar panels. Some leases may prohibit modifications to the property or require written consent from the landlord before making changes.

Can you go solar if you rent a house?

If you rent your home and find that you aren't the right fit for community solar, you can still go solar in some other unorthodox ways, but components such as inverters can get expensive. The most straightforward option may be to ask your landlord or the company that owns your building to install panels.
