

Scalable Discounts for Solar-Powered Containers for Highways

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

Whether it's a single microgrid for a remote facility or a portfolio of systems across multiple sites, our solutions are scalable, efficient, and built for rapid deployment.

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

Covering highways with solar panel roofs could offer significant benefits in terms of safety and carbon emission reductions, a new analysis suggests.

SB 49 would direct state agencies to evaluate potential for solar energy, battery storage and transmission infrastructure alongside highways to help California meet its clean energy targets ...

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up.

Although our Solarators(TM) require a higher initial investment compared to standard diesel alternatives, their operating costs are virtually zero, offering a stark contrast to the high operating expenses of ...

Petroleum companies often operate in distant locations with limited access to grid power. This is where a mobile solar containers can act as an additional power source to run the equipment.
