

Kosovo has taken a significant step towards a sustainable energy future by granting its first-ever licenses for battery energy storage systems.

The new publicly owned enterprise "Energy Storage Corporation (ESC)" will operate as a joint-stock company with the Republic of Kosovo as its sole shareholder, and during the 5-year ...

The investment in the school's new thermal insulation, energy-efficient doors, windows, and lighting, and a new and efficient heating system will reduce its energy consumption by more than 70% and lower ...

Kosovo will conduct its first wind power tenders in two rounds, each for 75 MW to 100 MW. The ME plans to issue the first call for qualifications in October 2024.

From stabilizing solar grids to keeping factories running, energy storage containers are Kosovo's silent power heroes. As renewable adoption accelerates, these systems aren't just optional--they're essential.

Kosovo plans to channel part of the U.S. grant into small-scale renewables --think solar farms powering rural schools. And with coal's days numbered, the country could become the ...

But here's the kicker - without proper energy storage systems, those shiny new solar panels can't really change the game. Let's unpack what's happening and who's stepping up to fix it.

The Energy Storage Project aims to support Kosovo's energy security by using battery storage systems to provide reserves, improving system availability, and reducing the cost of securing adequate ...

The government of Kosovo this week announced it will build a battery energy storage system (BESS) with a capacity of 200MWh-plus to deal with the country's energy crisis.

The objective of the Battery Energy Storage System (BESS) project is to support Kosovo's energy security and transition to a cleaner energy future through usage of energy storage systems for ...
