

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory ...

Replace energy from your local grid with cleaner power from integrated on-site solar and storage systems. Generate and store electricity to protect against outages, avoid price spikes, and maximize ...

EticaAG, a manufacturer of battery energy storage systems (BESS), has partnered with oil giant Shell to speed up the advancement and use of battery immersion technology in BESS.

We are building an interconnected power business to increase the availability of renewable power in the markets where we operate. But our ambition in power goes beyond ...

Shell is making its first direct equity investment in a grid-scale battery anywhere in the world, partnering with Macquarie to deliver a utility-scale battery energy storage system (BESS) in Australia.

Find out about the benefits of battery storage optimisation with Shell Energy Europe today.

Grid-scale Battery Energy Storage Systems (BESS) are innovative solutions for energy storage and supply that are helping Australia power towards net zero.

Explore Shell's strategic investments and partnerships driving the energy transition. Learn about their advancements in renewable energy and energy storage solutions.

According to a statement from the supermajor, Shell Energy Europe will use its trading capabilities to manage a renewable power portfolio for Google to mitigate the intermittency of ...

With Shell Energy's BESS solution, you are boosting your business' bottom line while helping provide grid stability in Australia's energy transition, one battery at a time.
