

Smart Flower Solar Power Generation Price

How much does a smartflower Solar System cost?

If we consider the price per watt for new solar systems is generally in the \$3-\$4 range in 2023 according to national estimates, then a Smartflower system costs between three and four times as much as conventional rooftop solar. And that's with the 40% bump in energy production from Smartflower's dual-axis tracking already factored in.

What is a smartflower solar panel system?

The SmartFlower solar panel system, however, definitely deserves this title. The distinct design of the SmartFlower system directly influences the way it functions. The SmartFlower consists of 12 'petals' which open up at the beginning of the day when the sun comes out.

How is smartflower different from other solar panels?

A quick glance at Smartflower makes it clear how different this solar sculpture is from the solar panel systems we're used to seeing on rooftops or ground-mounted arrays. Aside from its looks, its dual-axis tracking capability allows Smartflower to generate up to 40% more energy than typical fixed solar panels, Gordon said.
