

What can a solar generator power?

These include things like a water heater system, central air conditioner, large heater, electric cooktop, power tools and so on. It's also great if you want to power multiple large appliances that would trip a regular 2kW or 3kW solar generator. You can plug in a fridge, washer, dryer, TV and more.

Can a solar generator be used as a backup power source?

Solar isn't just for rooftops - you can use portable solar products like solar generators as a backup power source if the grid goes down or as a source of electricity for your campsite, RV, or boat. But what is a solar generator exactly? And how does it compare with typical fossil-fuel-powered generators?

What is a good portable solar generator?

If you want a portable solar generator that can power most appliances, the Jackery Explorer 2000 Pro is a good pick. It comes with a built-in 2200W inverter, meaning it can power most household appliances including a full size refrigerator, TV, blender and others. You can also run power tools off the 2000 Pro.

Can a solar generator power a gas generator?

Solar generators are starting to catch up to gas generators in terms of power output. The Bluetti AC500 is a great example of this. With the pure sine wave 5000W inverter, it can power a wide range of heavy duty appliances that you'd normally run with a noisy propane or gas generator.
