

Abstract Brackets for photovoltaic ("PV") modules are described. In one embodiment, a saddle bracket has a mounting surface to support one or more PV modules over a tube, a gusset ...

When the module bracket (10) supports two adjacent photovoltaic modules (30) in the photovoltaic support (20), the photovoltaic modules (30) can be prevented from falling off.

ARRAY products and technologies are protected by patents in the U.S. and elsewhere. This website is provided to satisfy the virtual patent marking provisions of Section 16 of the America Invents Act and ...

The present disclosure, in accordance with various example embodiments thereof, relates to a mounting bracket assembly for coupling one or more solar modules (e.g., PV modules) to ...

The utility model belongs to the technical field of solar photovoltaic, and particularly relates to a solar photovoltaic panel bracket.

WO2025208935 - ADJUSTABLE SOLAR BRACKET. A photovoltaic (PV) support structure is configured to support a PV array of PV panels. The PV support structure includes a ...

A solar module mounting bracket assembly includes a rail configured to support a solar module thereon, and a pair of braces. The braces each have a first end portion movably coupled to the rail.

The present invention relates to technical field of photovoltaic power generation, in particular it relates to a kind of photovoltaic bracket that may be disposed at container top.

The photovoltaic assembly is typically mounted on a support system to allow the support system to support the photovoltaic assembly, so as to enable the photovoltaic assembly to be at a certain ...
