

Top of pole mount with 3 solar modules. This is ideal for small well pump systems. Bracket secures to top of 4" steel pipe using attached set-screws. 11ft of 4" pipe is included. When wired as string of ...

Solar systems for hot water generation are usually used to provide hot water in the household, for swimming pool heating, for heating support and for process heat generation. They thus offer a ...

For remote properties and off-grid properties, solar-powered well pumps provide a reliable water supply without grid electricity. This article highlights five top-rated solar well pump kits ...

DC powered pumps are used for deep and shallow well pumping, stock tanks, irrigation, water pressure systems, and many other areas. This guide is recommended reading for installers, users, and well ...

As solar farms creep into more "interesting" geological locations, pipe pile photovoltaic support installation is becoming less of an option and more of a survival skill. The question isn't whether to ...

Longitudinal sealing is obtained by means of the self-adhesive overlap. The external cover is in PVC. The support is also available with a collar and a special metal support which ensures greater overall ...

Regular maintenance of a solar pipe system is essential to optimize performance and extend the lifespan of the installation. Typically, conducting professional inspections annually is ...

RPS Solar Pump Kits are for people that believe in getting the job done themselves, and getting it done right. Our goal is to arm you with the equipment and knowledge to take control of your water and ...

Just anchor down a steel pipe vertically in cement and fasten the RPS Adjustable Top-of-Pole Mount to the top. This mount allows you to adjust the tilt angle of the panels to get maximum pumping power ...

Explore solar-powered heat tape solutions to prevent frozen pipes with energy-efficient electrical heat tracing. Perfect for off-grid living and water line freeze protection!
