

What is a portable solar generator?

The solar panels used in conjunction with a portable solar generator are mobile and easy to manipulate. Unlike the panels found on residential or commercial properties, they are smaller in size and have a lower wattage capacity, which means less solar input than their larger counterparts.

What is a solar generator?

A solar generator captures and stores solar energy in a portable power station using solar panels. EcoFlow solar generators feature high-efficiency panels, flexible power outputs (300-7200W), and durable, portable designs built to last.

How do solar power generators work?

These systems capture sunlight via solar panels, convert it into electricity with an inverter, and store it in a battery for later use. Whether you need backup power at home, energy for off-grid adventures, or a portable option for outdoor events, solar power generators offer a flexible and eco-friendly solution.
