

The solar module Tier 1 list is calculated and published quarterly, based on a two-year period before the beginning of the quarter, and the earlier of financing or commissioning date.

Comprehensive guide to solar module prices in 2025. Current costs, market trends, buying strategies, and price forecasts. Updated with latest data.

The H1 2024 release of this biannual report covers solar PV system costs and prices in the United States across all market segments. It includes detailed component breakdowns for ...

The guidance below addresses these and other questions about proposal evaluation to help you make a confident decision about your clean energy project or purchase.

Our PQP reports and results support informed solar procurement and investment decisions. Discover more about PV module components, our testing methods and scoring of PV modules.

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown ...

Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. Read more to find out how these cost benchmarks are ...

Importation duties, oversupply, and supply chain costs have led to significant solar module pricing volatility, particularly since the start of 2023. New technology is rapidly evolving improving efficiencies ...

Each year, the U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) ...
