

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

Learn how the NEC, UL standards, building codes, and permits impact solar power projects, plus tips to ensure your installation is safe and compliant.

Generac Solar & Battery Solutions provide a more powerful, resilient and smart way to manage your energy needs. With rising electricity costs and an aging grid, it's time for a reliable solution that gives ...

USA TODAY's analysis found 15% of counties nationwide now have some impediment to new utility-scale wind and solar energy. Gauging those impediments required researching a variety ...

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. If there are trees near your home that create excessive shade on ...

The continued growth of the distributed solar market has prompted electric utilities, regulators, and others to consider improvements to the interconnection processes. Below are ...

These restrictions can include permitting rooftop-mounted solar panel systems but not ground-mounted systems, or limiting system installations to certain property locations, such as a side yard or backyard.

Paradoxically, the states most likely to do this are some that would greatly benefit from solar power, like Oklahoma, Kansas, and Nebraska. This article will list all the states with the largest ...

This report, produced by the National Renewable Energy Lab (NREL), presents results from an analysis of distributed solar interconnection and deployment processes in the United States.

1.1 The inquiry into solar panel providers imposing power limitations reveals a notable landscape, with specific companies implementing restrictions based on technical performance and ...
