

Togo has taken a major step forward in its renewable energy push with plans to build a 62 MWp solar power plant in Sokodé. The project, backed by a EUR26.5 million (17.4 billion CFA francs) investment from ...

Togo, a small West African nation, is poised for a significant boost in its renewable energy capacity. In May 2025, the African Development Bank (AfDB) approved a financing package of EUR26.5 million ...

Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapong solar project will include 36,000 solar panels across 52 hectares, along with...

This plant, the largest in West Africa, uses solar tracking technology that maximizes panel efficiency. It significantly contributes to reducing CO<sub>2</sub> emissions, with more than one million tons avoided ...

Explore Togo solar panel manufacturing landscape through detailed market analysis, production statistics, and industry insights. Comprehensive data on capacity, costs, and growth.

Since 2020, Togo has increased its electrification rate from 52% to 69%, providing thousands of rural households electricity through solar kits and the Blitta solar power plant.

Togo enjoys strong solar potential, with an annual average solar irradiation of 4.5 kWh/m<sup>2</sup>/day to 5.5 kWh/m<sup>2</sup>/day. The sun-rich south and central savannahs, especially around Lomé and Sokodé, make it ripe ...

Meridiam has signed a 25-year Concession Agreement with the Republic of Togo and EDF for the design, construction, financing and operation of a 64 MWp photovoltaic solar power plant in Sokodé, in the ...

The 42MW solar PV plant in Sokodé represents a significant milestone in Togo's renewable energy journey. With the continued support of international partners and the firm commitment of the ...
