

Join the public hearing Tuesday for a massive 5,600-acre solar project near Keo. Don't miss your chance to participate!

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...

The 300-megawatt, 6,000-acre project, the Downstream Solar Energy Center, would be the second in Arkansas by Invenergy, a privately held leader in renewable energy development.

A public hearing is planned for Tuesday (Aug. 5) at the Lonoke County courthouse at 10 a.m. to discuss details of a potential 5,600 acre, 300 megawatt solar field near Keo.

Downstream activities in solar are project development, distribution and installation. With low capital requirements, the industry is fragmented. Most value is created in project development.

Using our DER tool, we evaluate granular project economics for DER installations across technologies (storage, solar, energy efficiency, and demand response), geographies, and rate structures to ...

A \$600 million solar energy project set to span more than 6,000 acres across Pulaski and Lonoke counties is moving forward, but the mayor of Keo says the small city is being overlooked ...

Unicorn Solar provides a brief overview of the upstream and downstream sectors of the PV industry, intending to highlight what happened in 2023 and the first half of 2024.

The Downstream Solar Energy Center is a proposed 300-megawatt solar energy project located in Lonoke and Pulaski Counties, Arkansas.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.
