

When a massive fire erupted at one of the world's largest lithium-ion battery storage facilities in Monterey County, it didn't just send plumes of smoke over nearby communities -- it cast ...

Students use SOLAR to register for classes, print schedules, view and pay bills, update personal contact information, view transcripts, and submit student employment timesheets.

The 30% federal income tax credit for residential solar is accessible to nearly all homeowners, which makes solar energy a smart choice in numerous regions nationwide.

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power.

Officials tell Channel 13 a lithium-battery fire broke out at Townsite Solar in Boulder City, south of Interstate 11 near US 95, on Tuesday night.

With solar-plus-storage projects expected to triple by 2027, these safety measures can't come soon enough. The question isn't if another explosion will occur, but whether we're implementing lessons ...

India's Solar Industries said on Thursday that one person died and eight others were injured in an explosion around midnight at its factory in Nagpur city, in the state of Maharashtra.

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is ...

When it comes to installing solar, our resources can help you determine the best options.

Hearing this explosion, they arrived at the STATCOM to find that a fire had broken out. Upon seeing this they commenced trying to manage the fire using fire extinguishers, but the fire was too big to control ...

An introduction to solar energy and types of solar energy conversion technologies including solar thermal and solar photovoltaics (PV).

Low-carbon energy sources like wind, solar, and batteries don't add to the global problem of climate change. But many of these projects are industrial sites, and their effects can still be felt...

Video circulating on social media showed smoke and flames erupting from the Moss Landing Power Plant on Thursday night in the Monterey County community of Moss Landing, about ...

Solar power is energy from the sun that is converted into thermal or electrical energy. Solar energy is the cleanest and most abundant renewable energy source available, and the U.S. has some of the ...

A fire at the world's largest battery storage plant in Northern California is smoldering after sending plumes of toxic smoke into the atmosphere.

Solar panels work through the photovoltaic (PV) effect. When sunlight hits the panels, it creates an electric current that is first used to power electrical systems in your home.
