

No, rooftop solar advocates told the good-government Little Hoover Commission at a recent hearing, rooftop solar doesn't cost other customers money, it actually saves them money.

While this only amounts to about \$36 per year, it's an additional fee that non-solar customers are not paying. That being said, the fee is intended to pay for costs that are associated...

Households without solar now pay as much as 27% more on their electricity bills to cover the subsidies provided to about 1.6 million solar-equipped homes. The core issue lies in how rooftop...

Instead of a net metering rate, households with solar get paid a price for their extra solar electricity that doesn't include any grid costs, effectively setting a higher rate for energy they buy than ...

You feel like something went wrong. If you're wondering why your electric bill is still high after going solar, you're not alone. Solar panels work great, but several things can stop you from ...

Roughly 10 million Californians without rooftop solar now pay as much as 27 percent more on their electricity bills to subsidize those who do. "The rates that residential customers pay can ...

SUMMARY: California's Net Energy Meeting (NEM) program compensates rooftop solar owners for the energy they produce, which offsets their electric bills. However, the program shifts grid maintenance ...

Enormous subsidies for solar and wind generation technologies are proving much more expensive than advertised. They also carry hidden costs and burdens on the grid, most recently seen ...

The CPUC report says solar customers who installed their systems before April 2023 are not paying their fair share of the fixed costs associated with distribution and transmission.

Consumers rushed to beat an April, 2023 deadline to avoid being paid lower rates for solar power they sell back to the grid. That drove a dramatic increase in homeowners' solar ...
