

Pluto was once our solar system's ninth planet, but has been reclassified as a dwarf planet. It's located in the Kuiper Belt.

Pluto & Kuiper Belt Oort Cloud Wanderers Movie Fact Sheets & Posters Other Planetary Links Chronology of Lunar and Planetary Exploration ...

The Sun is the star at the heart of our solar system. Its gravity holds the solar system together, keeping everything - from the biggest planets to the smallest bits of debris - in its orbit.

NASA's real-time science encyclopedia of deep space exploration. Our scientists and far-ranging robots explore the wild frontiers of our solar system.

This site is maintained by the Planetary Science Communications team at NASA's Jet Propulsion Laboratory for NASA's Science Mission Directorate.

Solar System Hello, Pluto! In July of 2015, a spacecraft named New Horizons arrived at Pluto after a long journey. It took amazing pictures of this dwarf planet and will ...

All About the Planets Our solar system is home to eight amazing planets. Some are small and rocky; others are big and gassy. Some are so hot that metals would melt on the ...

NASA's Solar System Interactive (also known as the Orrery) is a live look at the solar system, its planets, moons, comets, and asteroids, as well as ...

Mars is the fourth planet from the Sun, and the seventh largest. It's the only planet we know of inhabited entirely by robots.

Our solar system includes the Sun, eight planets, five officially named dwarf planets, hundreds of moons, and thousands of asteroids and comets. Our solar system is ...

Mars, the red planet, is the seventh largest planet in our solar system. Mars is about half the width of Earth, and ...

Using this new definition, there are eight planets in the solar system: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. Pluto was re-classified as a "minor planet".

Listen to an audio version of this page. A planet is a large space object which revolves around a star. It also

reflects that star's light. Eight planets have been discovered in our solar system. ...

Our solar system consists of our star, the Sun, and everything bound to it by gravity - the planets Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune; dwarf planets such as Pluto; dozens of moons; ...
