

Together with staff from the Saigachiy Wildlife Refuge, they installed a robust, low-maintenance solar pumping system featuring a submersible pump, solar panels, sensors and a water ...

It includes a solar-powered water pump that draws water from a vertical well 180 meters deep. Currently, the system is used to irrigate 0.8 hectares of land, benefiting 10 households and ...

Need Help? If you are having problems logging into SOLAR, there are a number of self-help and support resources available to you:

Solar technologies are categorized as either passive or active depending on the way they capture, convert and distribute sunlight and enable solar energy to be harnessed at different levels around the ...

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is ...

Ten sets of photovoltaic plants (PVPs) for power supply of deep-well pumps and solar WTSs were installed with the participation of Uzbekistan compa-nies OOO Solar Design, OOO Solar Nature, and ...

The new drip irrigation system has been introduced in Akkurgan District, Tashkent Region -- an area known for its challenging water supply conditions. The system includes a water pump that ...

Solar power is energy from the sun that is converted into thermal or electrical energy. Solar energy is the cleanest and most abundant renewable energy source available, and the U.S. has some of the ...

The Tashkent region in Uzbekistan has recently welcomed its first solar-powered pumping system, marking a significant step towards sustainable agriculture in the area.

Solar panels work through the photovoltaic (PV) effect. When sunlight hits the panels, it creates an electric current that is first used to power electrical systems in your home.

The European Union and the United Nations Development Programme have launched a new solar-powered drip irrigation system in the Akkurgan district of the Tashkent region, the press service of ...

This article explores the benefits, technical insights, and real-world applications of photovoltaic solar water pump systems in arid regions. Discover how this technology aligns with Uzbekistan's ...

Discover why rising electricity prices make solar a great investment in 2026, even after the 30% federal tax credit expires. We break down the long-term savings.

Whether you require a rooftop solar plant, solar water heater, solar pump, solar light, or even a solar EV charging station, we have you covered. As a responsible solar energy company in Uzbekistan, we ...

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...

The installation can serve over 20 households with subsidiary farms covering a total area of more than 3 hectares. Compared to standard drip irrigation, water savings can reach up to 60%. ...
