

The projects align with Thailand's ambitious 5-gigawatt renewable energy feed-in tariff program, described as Southeast Asia's first large-scale procurement combining solar generation ...

GreenRock Energy Partners, a leading Thailand-based renewable energy firm, is set to significantly expand its solar PV and energy storage portfolio. The company plans to add an ...

"This portfolio of projects significantly enhances solar energy and solar energy with battery storage in Thailand, marking a major step forward in the country's goal of achieving carbon neutrality.

"Our report shows Thailand can prioritize deployment of renewables and energy storage to meet growing electricity demand," said Ponglert Chanthorn, BNEF's Thailand and Singapore lead ...

Rising electricity demand from electric vehicles and data centres has been reliably met with solar and batteries. The study concluded that prioritising solar and storage policies and ...

In Short : The Asian Development Bank (ADB) has signed a \$350 million financing agreement with Gulf Renewable Energy (GRE) to support Thailand's clean energy transition. The ...

Thailand can cut fossil fuel imports by maximising solar and storage and decentralising energy production through a small-scale redistributed renewable energy system, the report said.

With the ASEAN Smart Energy & Energy Storage Expo 2026 set to take place in March 2026 in Bangkok, Thailand, this flagship event will focus on solar PV, energy storage, batteries, power ...

Solar, coupled with battery storage, represents the optimal pathway to address this trilemma. The energy transition of Thailand towards home-grown renewables could lower energy costs, cut ...

The increased solar and energy storage targets could sustain the forecasted electricity demand increase from data centres and EV charging in the coming years.
