

The largest battery energy storage design in Cyprus

In May 2025, Cyprus successfully commissioned its first significant battery energy storage system (BESS), marking a major step toward enhancing the country's energy infrastructure and ...

The energy regulator has approved a significant battery storage system totalling 120MW across three locations to enhance grid stability and security, marking a crucial step for the island's ...

Operated by the University of Cyprus, this is the country's largest battery project to date and the first of its kind at this scale. The BESS is integrated with a 5 MWp solar PV installation that ...

Cyprus has taken a step toward modernizing its energy infrastructure with the commissioning of a 3.3 MWh BESS as part of the Apollon PV Park. Operated by the University of ...

The project would combine 72MW of solar PV with a 41MW/82MWh lithium-ion battery energy storage system (BESS), making it the largest to-date of either technology type. It would be ...

The Cypriot Department of Environment has approved the project for what is set to become one of the country's first battery energy storage systems. HESS Hybrid Energy Storage ...

This project, the largest of its kind in the country, marks a significant milestone in integrating renewable energy solutions to enhance grid reliability.

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy Storage Systems is ...

The project would combine 72MW of solar PV with a 41MW/82MWh lithium-ion battery energy storage system (BESS), making it the largest to-date of either technology type.
