

A Swiss startup has achieved a groundbreaking milestone by launching the world's first photovoltaic solar plant on railway tracks, promising to revolutionize renewable energy integration in ...

In Switzerland, a solar technology startup is making use of open spaces between railway tracks to place solar panels. The panels can collect solar power, even with trains using the railway ...

On April 24, 2025, Sun-Ways inaugurated the world's first track-mounted solar power plant open to rail traffic.

Swiss startup Sun-Ways has launched what it claims to be the world's first removable solar power plant installed on active railway tracks, located in the Neuchâtel mountains.

Looking at the tracks became a source of inspiration for reinventing solar power generation. While other similar initiatives exist around the world, Sun-Ways has now created a world ...

Swiss startup Sun-Ways has launched the world's first removable solar power plant on active railway tracks, with passenger trains set to run over the 18 kW installation starting April 28.

Switzerland is pioneering the concept of turning its national rail network into a massive, decentralized power plant, and the results could reshape the future of green energy infrastructure. ...

Oct 11, 2024 Swiss authorities have given the greenlight to a three-year pilot project to install removable solar panels on a railway track in western Switzerland.

The Swiss start-up Sun-Ways has inaugurated the world's first removable solar power plant built directly into an operational railway line.

Swiss startup Sun-Ways has switched on a removable solar plant installed on a functioning railroad line in western Switzerland. The array, billed as the world's first track-mounted ...
