

With an average of over 3,000 hours of sunlight annually, Tunisia is ideally positioned to harness solar power to meet its energy demands sustainably. The importance of solar energy in Tunisia lies in its ...

By Abdullahi Lukman Tunisia has advanced its energy transition agenda with the award of new renewable energy concessions to major international developers, as part of its 1,700MW ...

Anglo-Tunisian group SoleCrypt announced plans for a 60 MW PV plant in Tozeur, part of a broader initiative to connect eventually to the Medusa submarine cable, enhancing Tunisia's energy...

Tunisia's push for renewable energy reflects significant progress through ambitious solar and wind projects, yet challenges such as regulatory hurdles, financing gaps, and grid infrastructure ...

Tunisia needs more than solar and wind energy to achieve sustainable full energy self-sufficiency. Tunisia is embarking on an ambitious long-term clean energy transition, anchored in the ...

To address these challenges, Tunisia has set ambitious targets : Reducing carbon intensity by 45% by 2030 and increasing renewable energy's (RE) share to 35% of electricity production.

Renewable energy is then expected to cover 50% of the electricity needs by 2035, and 100% of all electricity needs by 2050. This represents 75% of Tunisia's commitments in terms of ...

Tunisia, a country with immense solar and wind potential, stands at a pivotal point in its energy sector. Renewable energy in Tunisia can address not only its energy poverty but also broader ...

Guided by Law No. 2015-12, the country has implemented key regimes--authorization, concession, and self-production--to promote solar, wind, and other renewable energy projects.

This initiative aims to harness Tunisia's renewable energy potential, creating significant job opportunities, driving economic growth and contributing to global climate change mitigation.
