

The IEEE PES ISGT Europe conference is a leading event focused on power grid modernization and the application of ICT to enhance energy systems, with an emphasis on integrating renewable and ...

Our portfolio of work will help integrate all sources of electricity better, improve the security of our nation's grid, solve challenges of energy storage and distributed generation, and provide a critical ...

The IEEE PES ISGT Europe conference is a leading event focused on power grid modernization and the application of ICT to enhance energy systems, with an emphasis on ...

Summary: As Malta accelerates its renewable energy adoption, grid-side energy storage systems in Valletta are becoming critical for stabilizing power supply and maximizing solar/wind integration.

Expanding and modernizing the electrical grid infrastructure is imperative given that global electricity demand is projected to grow by 150% by 2050. How can grid planners, operators and...

To help unlock the potential of renewables and ensure a reliable, resilient grid, we consider a tri-phased scaling strategy. This strategy navigates progress in three distinct phases, each building upon the ...

Join Power, Utilities & Renewables leaders Christian Grant and Craig Rizzo on the key challenges shaping the distribution grid and its modernization, risks of inaction, and considerations for ...

As industries shift toward electrification, a modernized grid is necessary to handle the changing energy landscape. Upgrading the grid means to strive for improved reliability, increased efficiency, enhanced ...
