

The plug & play implementation we have today is the famous serial-starter. In essence it just iterates through all possible drivers, starting them one by one against all available serial-ports: a ...

Hi, I have been working on a serial connection to a cerbo. I used the command `/opt/victronenergy/serial-starter/stop-tty.sh ttyUSB0` to prevent serial_starter running the gps service ...

Thinking about the viability of the solution that connects the SBMS0 to the Raspberry Pi electrically. Unlike other BMS's used with VenusOS, an SBMS0 may have several connections to the ...

Since the system is read-only now (good), there should be a way to add (include) rules to `/etc/udev/rules.d/serial-starter` les using the data partition, so the rules can survive a firmware update.

It seems that serial-starter is ignoring my "ignore" rules and grabbing the ports anyway, or something else is locking them. I found that I can restore functionality via SSH, but I have to ...

This allows the serial starter to create services for dbus-serialbattery, if a new serial adapter is connected. The serial starter service (`/service/serial-starter`) then creates a service ...

Intro Contents What's Involved Developing A Driver Installing A Driver Stability - Exceptions Handling Logging There are two related ways to "install" a driver. Most drivers are tied to a serial port and thus can be set up to be invoked by serial-starter. For other drivers, see the second technique below. See [more](#) on [github-wiki-see.page.wr_hlic](#), [.wr_hli](#) {margin-top:4px;color:#767676;display:block}.wr_hlic>.wr_hli,.wr_hli>*,.wr_hli [li](#) {display:inline}.wr_hli+.wr_hli::before{content:"|"}
~~Victron Energy Support - Victron Energy Get in touch Enter your serial number so we can connect you to the original dealer for support, repairs and warranty requests.~~

In Venus OS V2.80 firmware the serial-starter does not start the second instance of my battery driver, but in V2.73 it does. I upgraded from V2.73 to the V2.80~38 (had the same issue before on earlier ...

Get in touch Enter your serial number so we can connect you to the original dealer for support, repairs and warranty requests.

You may wish to add a driver that doesn't connect to a serial port and, thus, is not something that would be invoked by serial-starter as described above. For example, like the dummy ...

what you need to look into is the serial-starter (search the roots) and udev (search the internet to understand it

generically, and search rootfs to see how we use it).
