

In March 2025, Japanese company Jigowatts announced plans to enter Vietnam's EV charging sector, introducing innovative battery storage-integrated chargers. Jigowatts aims to address grid stability ...

Summary: Ho Chi Minh City is rapidly adopting energy storage DC charging piles to support its growing electric vehicle (EV) market. This article explores how these systems work, their benefits for urban ...

Vietnam's REA and GEAPP hosted a workshop on integrating battery energy storage systems into Vietnam's power grid, where they also launched a report on battery storage co-authored by the ...

To minimize charging downtime, there is a growing emphasis on deploying fast DC and ultra-fast chargers capable of replenishing batteries in under 30 minutes. These are especially ...

The Vietnam Dual Gun Direct Current Charging Pile Market is segmented based on key factors such as product type, application, end-user, and distribution channel.

The Vietnam market for home EV DC charging stations and pile management is projected to grow steadily over the next five years, driven by government initiatives promoting electric ...

Summary: This article explores Hanoi's evolving standards for energy storage charging pile equipment, including technical specifications, certification processes, and emerging opportunities in Vietnam's ...

Solutions emphasizing high-efficiency AC wallboxes and DC fast chargers, with features like intelligent load management, can enhance compatibility with Vietnam's diverse EV fleet and variable grid ...

AC Energy (ACEN) and AMI Renewables, a Vietnam-based renewable energy (RE) platform, will be launching a pilot utility-scale battery energy storage system (BESS) in the Southeast Asian nation's ...
