

With the rapid growth of renewable energy in recent years, industry experts are urging Vietnam to increase the use of battery energy storage systems (BESS) within its national power grid.

With nearly 20 years in renewable energy, SolarBK has evolved from manufacturing solar panels to integrating intelligent energy storage solutions. Unlike importing full turnkey systems, ...

One of the key highlights of Vietnam's revised Power Development Plan VIII (PDP8) is the significant increase in the targets for Battery Energy Storage Systems (BESS). The original PDP8 approved in ...

Experts agreed that battery storage would play a transformative role in Vietnam's energy transition. The 2026-2030 period would be crucial for deployment, especially now ...

The Vietnamese government has approved two new solar power plants and two battery energy storage systems (BESS) in the Nam Dinh and Thai Binh provinces. These projects are set to ...

Battery Energy Storage Systems (BESS) offer a transformative opportunity to modernize the energy sector. BESS enhances grid stability and facilitates renewable energy integration, helping ...

The Ha Tinh project aims to sidestep some grid issues by using Vietnam's first Direct Power Purchase Agreement (DPPA) model for combined solar and battery storage.

Vietnam is one of the first three countries selected for a pilot program under a new partnership initiative between the Asian Development Bank (ADB) and the Global Energy Alliance for ...

Vietnam is accelerating efforts to develop a large-scale battery storage market, aiming to strengthen its renewable energy transition.

In essence, Vietnam is revolutionizing its energy landscape through BESS, aiming for a smarter, sustainable, and secure energy future. Actual images of some rooftop solar projects with BESS ...
