

How do I use a waterlily turbine?

Plug your device into the turbine's USB output. The WaterLily Turbine is bulkier and takes a little more effort to use than solar chargers, though after getting acquainted with it, the turbine adds a good amount of power generating versatility, as well as a 24-hour energy source, to those who carry it.

How much power can a waterlily generate?

In an average river, the WaterLily can charge most small electronics at the same rate as a wall-charger. The faster the water flow, the more power WaterLily can generate, up to 15 watts. The durable, drop-proof housing is built to last and will ensure you can produce power through any outdoor adventure.

How does waterlily work?

WaterLily is a portable turbine that generates power from rivers. It can charge USB and 12V devices, including cell phones, battery banks, camp lights, and Bluetooth speakers. When used in an average river, it can charge most small electronics as fast as your wall outlet at home.

Can a waterlily be used in a river?

It can charge USB and 12V devices, including cell phones, battery banks, camp lights, and Bluetooth speakers. When used in an average river, it can charge most small electronics as fast as your wall outlet at home. Tow WaterLily behind your canoe or kayak during the day or set it up in a river when you camp at night.
