

West African solar energy storage power station put into operation

Launched on May 22 in the southern region of Kolda, the hybrid power plant will generate 60 megawatts (MW) of solar energy and store 72 megawatt-hours (MWh), supplying clean electricity ...

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, as the country ...

Axian Energy, Voltalia, and Entech have announced the signing of an EPC (Engineering, Procurement, and Construction) contract for Senegal's NEA Kolda project, It is the largest ...

The project, named Walo Storage, represents the first solar-plus-storage facility in West Africa dedicated to frequency regulation. It officially entered commercial operation on July 14,...

West African independent power producer Africa REN has commissioned a 16-MW solar farm with 10 MW/20 MWh of battery storage in Bokhol, northern Senegal, hailing the project as the ...

Independent power producer Africa REN has commissioned a solar-plus-storage project in Senegal. The Walo Storage project is the first solar installation in West Africa to include energy ...

Described as a first for West Africa, a solar PV installation with battery storage project dedicated to frequency regulation has been commissioned in Senegal.

The Walo Storage project was put into commercial operation on 14 July, Africa REN announced last week (6 August), around 12 months after construction started.

AXIAN first introduced the initiative in November 2024 as West Africa's largest solar-plus-storage complex. In April 2025, Voltalia and Entech Smart Energies won the contract to lead ...
