

With a capacity to generate 15 megawatts of power, the Vestas V236-15.0 MW is the largest and most powerful wind turbine as of 2025 to have ...

China is by far the largest installer of wind power in the world, more than tripling the second-ranked United States. As of the end of 2024, China had cumulatively installed over 561...

The world's largest wind farm is currently the "Western Green Energy Hub Wind Farm," with a planned capacity of 25 GW and 3000 wind turbines. The biggest wind farm in the world is part of a larger 70 ...

With a capacity to generate 15 megawatts of power, the Vestas V236-15.0 MW is the largest and most powerful wind turbine as of 2025 to have been commercially deployed.

Offshore wind turbines are the largest of all, and can harness ...

The world's installed wind power capacity now meets well over 10% of global electricity demand - and much more than nuclear power. More than 30 countries now have a share of wind ...

Offshore wind turbines are the largest of all, and can harness powerful ocean winds and generate very large amounts of electricity. Modern wind turbines can generate electricity at wind speeds as low as ...

The largest wind farm, Black Spring Ridge in Vulcan County, Alberta, boasts 166 wind turbines. Even smaller communities like Richibucto and Rexton in New Brunswick contribute to green ...

Kenya is building a wind farm, the Lake Turkana Wind Power (LTWP), in Marsabit County. As Africa's largest wind farm, the project will increase the national electricity supply while creating jobs and ...

The average for 2022 based on 189 countries was 11.16 billion kilowatthours. The highest value was in China: 762.67 billion kilowatthours and the lowest value was in Afghanistan: 0 billion kilowatthours. ...

Explore the top 13 largest wind farms in the world by capacity, with key facts, stats, and global clean energy insights.

This graphic shows the global leaders in wind power energy as China surged ahead while the U.S. faced setbacks.
