

Wind power generation operation and maintenance training

This GWO-certified course introduces key mechanical components, safe handling of tools, torque and tension principles, and maintenance procedures relevant to wind turbines.

This self-paced course offers a practical introduction to wind turbine maintenance using the ACM Wind Energy Simulator. Learn to interpret controller readouts and respond to normal and exceptional operating conditions.

Advance your skills in wind turbine maintenance and repair with Pertecnica Engineering's specialized course. Contact us today to schedule your session and enhance your expertise in managing and maintaining wind ...

This high-quality, 3D-animated computer-based training program encompasses a wide range of essential topics and OEM-specific content for wind turbine site operations and maintenance.

This course is relevant for professionals in the power generation and energy sector, particularly those involved in operations, maintenance, and optimisation of wind power plants.

This comprehensive training course on wind energy systems installation and maintenance provides participants with the knowledge, skills, and practical experience needed to excel in the renewable energy sector.
