

In Yemen, the power industry has been weakened because of the rash and reckless energy policies over the past three decades, hindering the development of cheap and abundant ...

In Aden Governorate, electricity is not just a utility, it is a lifeline. The city's collapsing power infrastructure has become a daily emergency, especially for women and girls.

Most households in Yemen struggle with irregular access to electricity and ongoing power outages. Excessive dependency on fossil fuels had become the only option for some. But as the ...

The public electricity system in Yemen is in a very poor condition. The war has damaged or destroyed generation capacity and transmission and distribution networks across the country.

Yemen's electricity sector faces significant challenges. From the suspension of Mareb power station from the national grid to the suspension of oil and gas production, Yemen remains among the world's ...

As documented in the World Bank's Damage and Needs Assessment (DNA Phase I) and the multi-agency DNA (World Bank, UN, EU and IsDB), the ongoing conflict has significantly damaged Ye ...

Even as of late October, residents of Aden were getting only two hours of electricity a day due to a shortage of fuel for power plants. By contrast, although Yemenis living in Houthi-run ...

Widespread damage to infrastructure, including the country's electricity grid, has plunged millions into darkness, and crippled access to essential services like healthcare, education and clean water.

In recent months, Aden has seen progress on solar energy initiatives, including the launch of Yemen's first large-scale solar power plant, which now supplies electricity to thousands of ...
