

On June 30, the sun was shining on the photovoltaic panels in Zhongguanyi Town, Tiemengang Township, Baiguo Town and other places in Macheng City, Hubei Province. The numbers on the ...

2015, Macheng Zhongguanyi, 110MW - biggest scale grid-connected PV power station in central China when completed.

It is the world's first project to use a trough-type photo thermal power plant as the main power source, realize clean energy from an isolated grid operation at a highaltitude and provide a 24-hour safe, ...

With the total scale of 110MW, this project is the largest single photovoltaic power station in Hubei Province up to now, of which 50MW has been installed and completed grid connection.

Understand the full story: Dive deep into the Zhongguanyi Solar PV Park report and gain access to vital information such as plant name, technology, capacity, status, plant proponents, and ...
